

QUALITY

Winnebago RVs are designed and built around you, with superior craftsmanship, advanced manufacturing technologies and steel-focused construction to enhance safety and reliability.

INNOVATION

From groundbreaking RVs to game-changing features to the spacious floorplans made possible by our SmartSpace™ design, our heritage is unrivaled for continuous industry firsts in vehicle technology and design.

SERVICE

Our carefully chosen dealers are supported by factory training and our advanced parts supply system, while owners benefit from excellent real-world customer support as well as 24/7 access to online technical information.

Adventure To Go – Anywhere.

Designed for outdoor adventure, the rugged award-winning HIKE 100 is light enough to be towed by a smaller SUV, has plenty of room for all your gear, and is loaded with features that make it easy to stay off-grid during extended-season adventures.

Rugged, Durable and Ready to Go

Built To Haul

The patented exoskeleton accepts Thule® accessories for carrying kayaks or other gear, while the 2-inch receiver accommodates your favorite bike rack. Some floorplans even provide up to 40 cubic feet of easily accessible indoor storage.

Take It Outside

Equipped with a Premium Suspension Upgrade: BAL® Independent Suspension with Dexter® TORFLEX® torsion stub axles and standard 16" Goodyear® Wrangler off-road tires, so it handles more rugged terrain.

Extended-Season Ready

The radiant foil barrier in the fully walkable roof blocks UV rays to keep you cool in summer and help prevent heat loss in winter, while the holding tanks in the fully enclosed underbelly feature 12-volt pad heaters to protect against freezing.

Designed For Easy Towing

Its low dry weight means the HIKE 100 is towable by a wide range of vehicles, and the narrow body offers better rear visibility, even without extended side mirrors.

Stay Out Longer

Longer stays are no problem, thanks to standard features like the 200-watt solar panel with 30-amp controller, prep for an additional solar panel, 31-gallon freshwater tank and 6-gallon water heater.

Floorplan Shown: 1316FB

Fully Capable. Wonderfully Comfortable.

Galley

The full galley includes an induction cooktop — portable, so you can take it outside — plus a 1.1 cu. ft. microwave, sink, and 3.1 cu. ft. compressor-driven refrigerator.

Sleeping Arrangements

The HIKE 100 is available in five floorplans and a variety of sleeping configurations accommodating up to 4 adults.

Wet Bath

The wet bath features a cassette-style toilet and full shower with power vent, and can also serve as a gear drying area.

Full-Height Ceiling

No more stooping: the HIKE 100 ceiling is a full 6'5" throughout — even in the bath.

TV/Bluetooth

The portable JBL® Bluetooth® speaker, TV prep and Wi-Fi prep can transform the living area into your personal theater, while the wireless charger keeps devices ready to go.

Premium Materials

Strong, lightweight and quiet, the 2" fiberglass sidewalls with Azdel composite panels and TransCore™ fully composite flooring provide outstanding durability and weather protection.

Make Yourself at Home in the Great Outdoors.

Exterior Living Space

Together with the powered patio awning, the batwing awning expands outdoor living space to nearly 200 square feet on 3 sides and has drop down panels to create an exterior shower or changing room.

Wash Station

The handy exterior wash station includes hot and cold water and a hose-mounted sprayer, making it easy to rinse off the day's dust — or enjoy an outdoor shower when conditions are right.

Exterior Kitchen/Storage

Cook out with the portable induction stove, or tap into the quick-connect LP fitting to fire up the grill. Some floorplans include a 2 cu.ft. Truma portable cooler in the exterior rear kitchen, and all include dual powder-coated fender gear storage compartments to haul your exterior kitchen supplies or gear.

- 6-gallon gas/electric/ DSI water heater
- 31-gallon freshwater tank
- 4.75-gallon cassette toilet
- 25-gallon gray tank

Warranty

See your dealer for complete warranty information.

FOOTNOTES

- The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of our vehicle may vary by several inches depending on chassis or equipment variations. Please contact your dealer for further information.
- Floorplans feature a wide-body design - over 96-inches. In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96-inches in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
- Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- Sleeping capacity is the maximum based on a specific floorplan.

Because features, specification, equipment, and options may vary from those highlighted on this website, the buyer is responsible for confirming with the dealer the features, specifications, equipment, and options included in their specific vehicle.

In addition, Winnebago's program of continuous product improvement may result in changes to vehicle specifications, equipment, model availability, and price without notice.
